

Please be advise that Satellite Radio makes the morning drive that much more enjoyble than listening to the idle chatter of people who think they are cute. I listen to what music I like, not what they want me to listen too. I get up to date news both International and National. I like the traffic reports and news and find it much more informative than the local stations.

The quality iof the stations ss much better and the sound is superb.

I pay for this adn do not want some lobbyist telling me that I cannot listen to what I want to listen to.

Dennis A. Griffis
